

Group members: Maggie Lyon

As per email sent 1/30 and follow up 2/1:

Hello Professor Zimmer!

My name is Maggie Lyon, I am a student in your evening data structures class. Unfortunately, until this morning, I was under the impression that I was working with my lab group as my homework group, as we discussed homework 1 together in lab last week. They just let me know, however, that they are working with another student in a different lab section for their group of 3.

As such, it seems i'm out of a homework group, and of the peers I was able to contact in class, everyone seems to have a group of 3 already set up. I went ahead and completed the HW1 by myself as not to inconvenience anyone with the short notice, and I am confident in my ability to continue doing so on future assignments if needed. If not, I would very much appreciate some assistance finding a group for the rest of the semester!

I apologize for the late notice, I wish I would have found out sooner that this was the case with my group. Let me know how you think I should proceed!!

Thanks so much,  
Maggie

Assignment was completed individually. All source code is in one file, no special instructions to run it.
